PROFESSIONAL SUMMARY

AI Engineer with **hands-on experience building 0→1 AI products**, specializing in **Generative AI, agentic workflows, and production-ready RAG systems**. Proficient in developing scalable AI platforms using **Azure OpenAI, AWS, Golang, and Python**. Strong foundation in **LLM integrations, prompt engineering, and core backend development** with end-to-end execution from prototype to deployment.

EXPERIENCE

Kapi AI

Apr 2025 - Present

AI Engineer

Bangalore, India

- Engineered scalable **RAG pipelines** and managed **Azure OpenAI** endpoints for multi-tenant GenAI environments, focusing on hybrid retrieval, prompt optimization, and structured output.
- Programmed multi-step **ReAct agent workflows**—including a compliance-aware SDR agent—with tool-calling, human-in-the-loop approvals, and PII redacting guardrails.
- Integrated **Langfuse** for system observability and built a visual GenAI App Builder (Next.js, ReactFlow) with unified **Composio** tool authentication.
- Contributed 350+ commits over 9 months as an early engineering team member, driving **0→1 AI product delivery** across Golang (CLI), Node.js (API), and Python (AI services).

HeyCoach

Dec 2024 - Mar 2025

AI Engineer

Bangalore, India

- Achieved an 80% cost reduction per lead and a 10% response rate by prototyping an AI-driven lead generation MVP and scaling the outreach workflow using **Mistral 7B LLM**.
- Saved ~25 manual hours monthly by deploying **LangGraph AI agents** for social media workflows, while establishing CRM API integrations to process 500+ leads/month.

Lumio TV – Circuit House

Sep 2024 - Nov 2024

Backend AI Intern

Bangalore, India

- Reduced server load by ~35% and improved response times by 30-40% by developing **Golang AWS Lambda** APIs featuring **Redis caching**.
- Fine-tuned **LLaMA 3.2 (11B)** and T5 models for systematic metadata extraction, and provisioned the backing AWS infrastructure using **Terraform (IaC)**.

Centre for AI and Robotics, DRDO

Aug 2023 - Nov 2023

ML Research Intern

Bangalore, India

- Enhanced detection accuracy by 20% and boosted mAP to 0.91 by designing a real-time **YOLOv5** drone detection system powered by iterative data augmentation.

PROJECTS & HACKATHONS

Plum Claims – AI Insurance Claim Adjudication

Live Demo

- Constructed a mock agentic AI claims system using **Vercel AI SDK** and Llama, featuring a real-time **SSE streaming** pipeline for live reasoning visualization.
- Delivered an **80% zero-API-cost** extraction rate via a 3-tier OCR cascade pipeline, and evaluated hybrid confidence scoring using a **RAG-augmented vector store**.

PaySense Agentic Concierge – Top 10 Hackathon Finalist Pine Labs Playground AI Hackathon 2025

- Prototyped a multi-agent e-commerce workflow using **AWS Bedrock (Claude Sonnet)**, placing in the Top 10 out of hundreds of participants.

- Generated 6,000+ unique Kanji characters from English prompts utilizing **Stable Diffusion**; processed 11,000+ movie posters utilizing AI-assisted title extraction over **LLaMA 3.2 (11B)**.

EDUCATION

B.M.S College of Engineering, Bangalore, India
Bachelor of Engineering in Artificial Intelligence and Machine Learning;
CGPA: 8.0/10.0

Dec 2020 - Jun 2024

TECHNICAL SKILLS

AI/ML	Agentic AI Workflows, RAG Pipelines, GenAI, Prompt Engineering, MLOps, ReAct Framework, MCP, Vercel AI SDK, LangChain, LangGraph, Langfuse, Azure OpenAI (GPT-4), Claude API, Groq, Mistral 7B, Llama 3.2/4, T5, PyTorch, HuggingFace
Languages	Golang (Go), Python, SQL, JavaScript, TypeScript, Bash, C++
Cloud & Infra	Azure (AI Search, OpenAI), AWS (Lambda, EC2, ElastiCache, DynamoDB, IAM), Linux, Terraform (IaC), Docker, Redis, Claude Code (CLI), Antigravity (AI IDE)
Backend & Integrations	RESTful APIs, Microservices, FastAPI, Express.js, Node.js, PostgreSQL, MongoDB, ChromaDB, Turso, Vector Databases, Composio, GitHub/Slack/Jira
Dev Tools	Git, GitHub, CI/CD, VS Code, ONNX Runtime, ReactFlow, Streamlit
